

Sprint 6 - Adding Additional Feature(s)

Team 22

Description of new Additional Feature:

The first additional feature that is being implemented is giving the user the ability to upload an image when they are creating a new post. The screenshots below show the process for a signed in user to upload a question and an image. The ability to display the image is not quite worked out but the uploaded image can be seen in the “static/images” folder in the project directory.
